African-American Women and Violence Training

Please note this is a description of one of Reanae's most popular trainings.

This training consists of explaining the dynamics of rape/sexual assault and/or domestic violence in African-American women's lives. It deals with the issue of:

- How to be a good counselor and advocate for African-American women who suffer from violence.
- Simultaneous oppression that African-American women deal with.
- Legal and medical advocacy.
- How to make your institution or services African-American women friendly.
- Internalized oppression.
- Strategies to help African-American women heal from violence.
- How to deal with socialized attitudes toward African-American women.

- Looking at empathy versus sympathy.

Reanae uses recorded interviews, stories, and poems on tape to help bring about understanding and awareness on how to counsel and advocate for African-American women. Her training is like no other training that you will ever experience
